2GIG

Firmware Version 3.0.1
2GIG GC3 PANEL

RELEASE NOTES

This document details the new features and enhancements for the release of the 2GIG GC3 Panel Firmware Version 3.0.1. To download the firmware update, visit: http://2gig.com/dealers/support-materials/firmware/

Support for Image Sensor

The GC3 panel now supports the Image Sensor. The **2GIG-IMAGE2** powered by Alarm.com combines the capabilities of a wireless PIR motion detector and a digital still camera. The Image Sensor offers traditional motion detection combined with visual confirmation of why the motion sensor was activated. To use the Image Sensor with GC3 the system requires the new **2GIG-XCVR3-GC3** to be installed.

NOTE: The **2GIG-IMAGE2** will NOT work with GC2 panels.

NOTE: The **2GIG-IMAGE1** will NOT work with GC3 panels.

Support for additional Thermostat

The GC3 firmware now supports the Alarm.com T2000 thermostat.

General Enhancements

- Improved Two-way Voice performance when switching between modes
- Improved Two-way Voice performance when using Listen mode with 3G radios
- Fixed issue with switching temperature to Celsius (Q24: Temperature display units)
- Improved performance of Periodic Test Reporting (Q36: Periodic Test)
- Various system performance enhancements
